"TEACH ME SOMETHING" (the teacher becomes the student)

Think of something (anything!) you are good at that would make for a good “teach me” presentation. Follow the directions below while planning and creating.

**Details**: you are expected to create a short lesson (=between 2 and 5 minutes) that is both fun and informative. Students and the teacher should be interested in what you are saying and not bored, but they should also be learning.

**How**: You can use the whiteboard, the projector, videos, music, and any other visuals that you want. I specifically demand a slide show (powerpoint). You can create handouts for the class, you can bring in art supplies and do a short activity, or you can just teach in a fun way.

- **Should teach us (your classmates and me, MrB) something!**
- **Should include graphics and text in a slide show (= a powerpoint presentation)!**
- **Should be at least 6 slides in length.**
- **If video is incorporated, video length must not exceed 30 seconds!**

Have fun and teach me something good!

MrB
